

ALPHA LIGHTING

Industrial and Commercial Lighting Specialists

LED

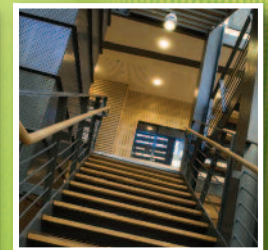

Energy saving LED lamps represent the latest technological breakthrough in low energy lighting systems and are particularly suited to commercial applications such as office lighting, shop lighting and window displays, etc.

LED lighting has many advantages over traditional lighting and low-energy lighting. It is highly energy-efficient, offering up to 94% savings.

Our range of LED lamps and bulbs are designed to replace and improve upon commercial applications such as offices, window display and many outdoor applications. Many of our LED lamps/tubes fit into the majority of traditional fittings and are suitable for retro-fit installation and new builds. LED lights/tubes are an ideal replacement for inefficient halogen lights.

A wide range of colours is available, including white light and warm light/daylight.

We offer businesses and commercial property owners a tested lighting solution and provide impressive savings on lighting costs. We can also submit a payback schedule, while interest-free Carbon Trust loans are available to fund appropriate projects.
